---

Tina and Clem,

According to the email below, the Poison Control Centers has been working to engage the Louisiana Department of Health for over 18 years. It appears that our Regional work to include PCC's in environmental emergency response has resulted in a much desired new working relationship between the two organizations. Mark Ryan, the Director of the Louisiana PCC is really excited about his programs information being provided on a health department FAQ sheet.

These are ready to be distributed to our folks on the ground to get out to people. If anyone needs printing assistance, let us know. And we should keep track of any costs of printing at any level to add to oil-spill related expenses.

Thank you  
Lisa
